

BUILD A BOAT

MATERIALS:

- Aluminum Foil
- Tape
- Drinking Straws
- Pennies
- Fish tank or dish pan full of water

DESCRIPTION:

Students create a boat using aluminum foil, tape and drinking straws that will hold the most pennies

DIRECTIONS:

- Give each group the same size piece of aluminum foil, two drinking straws, and 12” of tape.
- Each group works together to create a boat that will float and ultimately hold pennies.
- Upon completion, the winning boat must float and hold the most pennies without sinking or turning over.
